REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The prior art fails to disclose or suggest a tongue cleaning device comprising a head having a scraping wall with a front surface facing the handle of the body, the front surface defining a debris retention recess; the debris retention recess being defined in the front surface of the scraping wall. This limitation, in combination with all of the limitations of claims 17, 23 or 28 makes the claims allowable over the prior art.
3. As pointed out by the applicant in the response (Pre-Appeal Brief Conference Request), filed August 18, 2005, the debris retention recess of Ripich et al. '228 is not defined in the front surface of the scraping wall. The front surface of the device of Ripich is defined by the placement of two walls (41 and 31) and not by a recess entirely defined in the front surface of the wall. These two walls of Ripich do not meet the limitations claimed by applicant; wherein the recess is "defined in the scraping wall" or "in the front surface of the scraping wall". The front surfaces of walls (41 and 31) are smooth and there are no recesses or depressions defined in these surfaces. Therefore, Ripich et al. '228 does not anticipate the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
